WOUT HAELVOET

SOFTWARE DEVELOPER

PROFILE

I am passionate about developing digital applications since a young age, from a weather station with arduino in high school to game engines with c++ in college. It is my dream to work on a digital innovative project where I can learn and improve as a developer.

EXPERIENCE

XR-Labs

September 2024 - January 2025

I was part of the XR-Labs team for my internship contributing on the project full-time. They create a VR simulation for the army and police to train scenario's and prepare for difficult missions. I mainly worked on the vehicle escape and the identification control of the NPC's in the simulator.

3D Geopunt

July 2024 - August 2024

Developed a 3D version of <https://www.geopunt.be/> as a test project for Digitaal Vlaanderen during a student job for a month. I learned the basics of web development there.

TECHNICAL SKILLS

Programming

- C++
- C#
- .Net
- Typescript
- Vue

Technologies

- Unreal Engine
- Unity
- QT
- CMake
- Photoshop
